

MM3103 Heat Sink

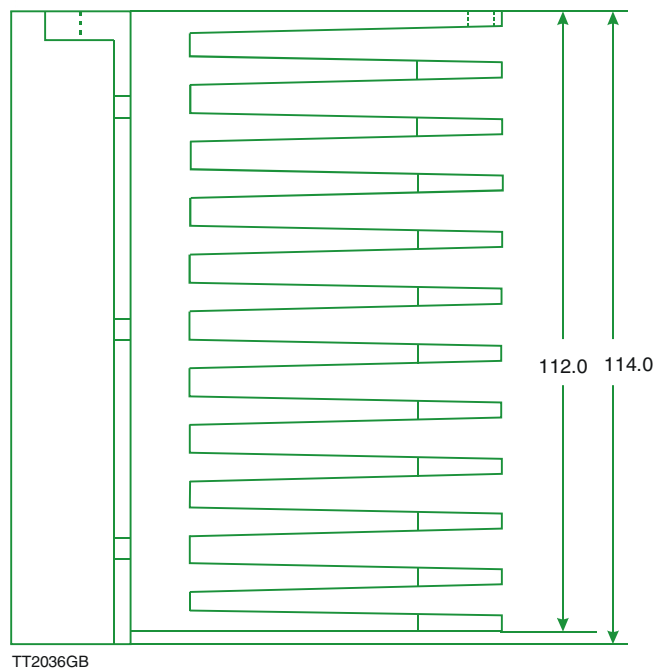

All dimensions in mm, Tolerance +/- 0.1 mm

The Heat Sink MM3103 is designed for mounting on the newer Mini Step Drivers SMD41 and SMD42 which can be mounted at a right angle to a surface.

It is used when extra cooling is required because of high temperatures in the environment or high work loads. The thermal resistance is 0.6K/W.

This Heat Sink is ideal for mounting the Mini Step Drivers, for example in a control cabinet.

The Heat Sink is black anodised and is delivered with four screws for mounting on the Mini Step Drivers.
